

**STATE OF UTAH
FORESTRY, FIRE & STATE LANDS**

**NOTIFICATION OF INTENT
TO CONDUCT FOREST PRACTICES**

Pursuant to **65A-8a-104** of the Utah Code, operators are required to notify the Division of Forestry, Fire & State Lands of their intent to conduct forest practices occurring on state and private lands. Operators shall notify the Division of their intent to conduct forest practices no later than 30 days prior to the commencement of such practices.

Utah Forest Practices Act

65A-8a-104. Notification of intent to conduct forest practices.

- (1) No later than 30 days prior to an operator commencing forest practices, the operator shall notify the division of the operator's intent to conduct forest practices.
- (2) The notification shall include:
 - (a) the name and address of the operator;
 - (b) the name and address of the landowner;
 - (c) a legal description of the area in which the forest practices are to be conducted; and
 - (d) a description of the proposed forest practices to be conducted, including the number of acres with timber to be harvested.
- (3) Upon the receipt of notification, the division shall, within ten days, mail to the landowner and the operator:
 - (a) an acknowledgment of notification;
 - (b) information on Forest Water Quality Guidelines; and
 - (c) any other information the division believes would assist the landowner and operator in conducting forest practices.

Definitions:

Class I Stream - streams or other bodies of water used for domestic water supply and/or the spawning, rearing, migration of fish, including impacted streams with recovery potential for a fishery. Also included are perennial streams that contribute significant flow to downstream fisheries.

Class II Stream - all streams that do not meet the Class I definition and are identifiable in the field as having a defined channel of bed rock, sand, gravel, or rocky material, definite banks, generally having an ordinary high water mark and confines and conducts continuously or intermittently flowing water. Also included are reservoirs, lakes, and ponds greater 1/10 acre that do not support fish or provide domestic water supply.

Wetland - areas that are inundated by surface or groundwater with a frequency sufficient to support, and under normal circumstances do or would support a prevalence of vegetation or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs and similar areas such as sloughs, potholes, wet meadows river overflows, mud flats and natural ponds.
